To make learning stick, students must be challenged to recall and apply their knowledge — and quizzes are a good tool for accomplishing that.

HENRY L. ROEDIGER III AND PETER C. BROWN

Testing is only 3 years behind retrieval practice, which is a central example of self-regulated learning. All of our experience has shown that taking a good quiz in our daily lives.

Ineffective Practices

Students may use as much or as little of the knowledge they take for granted. However, given the variety of ways in which students learn and engage in the study of psychology, learning can be viewed as a complex process. In some ways, retrieval practice can be thought of as a way to help students learn course content, rather than just memorizing it.
